Earbuds X3 Lite

Great entry-level TWS earbuds with premium sound quality.

28 Hours* Battery Life - Ready for Non-stop Enjoyment

Optimized for low power consumption, the Earbuds X3 Lite features a combined battery life of **28 hours (with charging case)**.

Outstanding performance with no worries — exercise, listen to music, watch films and enjoy long phone calls.

Music Playback

6 Hours*

Total with charging case

28 Hours*

Calls

4 Hours*

Total with charging case

17 Hours*

45mAh steel-cased lithium battery

500mAh battery capacity for charging case

Dual Device Connection - Seamless Switching

- Earbuds X3 Lite can be connected with two devices simultaneously. With its dual connection supporting smartphones, tablets, PCs and other smart devices, you can watch a video on the tablet, but still open to receive any phone calls.
- Sound switches between two devices automatically.

AAC and SBC dual-audio Decoding

AAC encoded files are comparable to music CDs, and AAC-encoded sound quality is nearly as good as, or better than, MP3 files encoded at the same or higher bit rate. For example, the sound quality of a 128 kbps AAC file is almost the same as, or even better than, a 160 kbps MP3 file. AAC files are smaller than MP3 files because of the lower bit rate.

SBC is the most basic Bluetooth audio codec and is a codec format mandated by A2DP (Bluetooth Audio Transmission Protocol). All Bluetooth devices will support this format.

Brand-new Bluetooth 5.3 – More Stable Connection

Bluetooth®

Core Specification v5.3

All-new Bluetooth 5.3 version ensures you a **more stable connection** experience **and faster transfer** experience.

All-new Bluetooth 5.3 version provides significantly improved interference protection in complex environments. Whether it's for gaming, calls, or music, the Earbuds X3 Lite will always keep you connected.

Think of the Bluetooth version as the road a delivery truck is driving down, and the higher the number means the road is smoother and wider, with a higher speed limit.

More Stable

**Faster
transfer**

**Stronger Anti-
interference Ability**

Low Latency Game Mode - Never Miss a Beat

Latency

73ms

Tap the earbuds for 3 times, enter the game mode

Earbuds X3 Lite deliver a more stable and faster connection for a better listening experience. The simultaneously synchronizing technology powered by Bluetooth 5.3, with **adjusting the size of the Bluetooth transmission packet, buffer size, retransmission mechanism**, can reduce **latency to as low as 73ms** *.

With the low latency, the audio and visual of your favorite game always remain in sync, giving you a competitive edge for the win..

Dual-mic AI ENC Noise Reduction for calls- Enjoy clear calls anytime, anywhere

The two-mic array on each earpiece combined with **AI ENC noise reduction technology** and **exclusive beamforming technology**, can intelligently filter ambient noise and accurately pick up your voice. Be it crowded subway stations or bustling streets, hear and be heard like you are conversing face to face with the Earbuds X3 Lite.

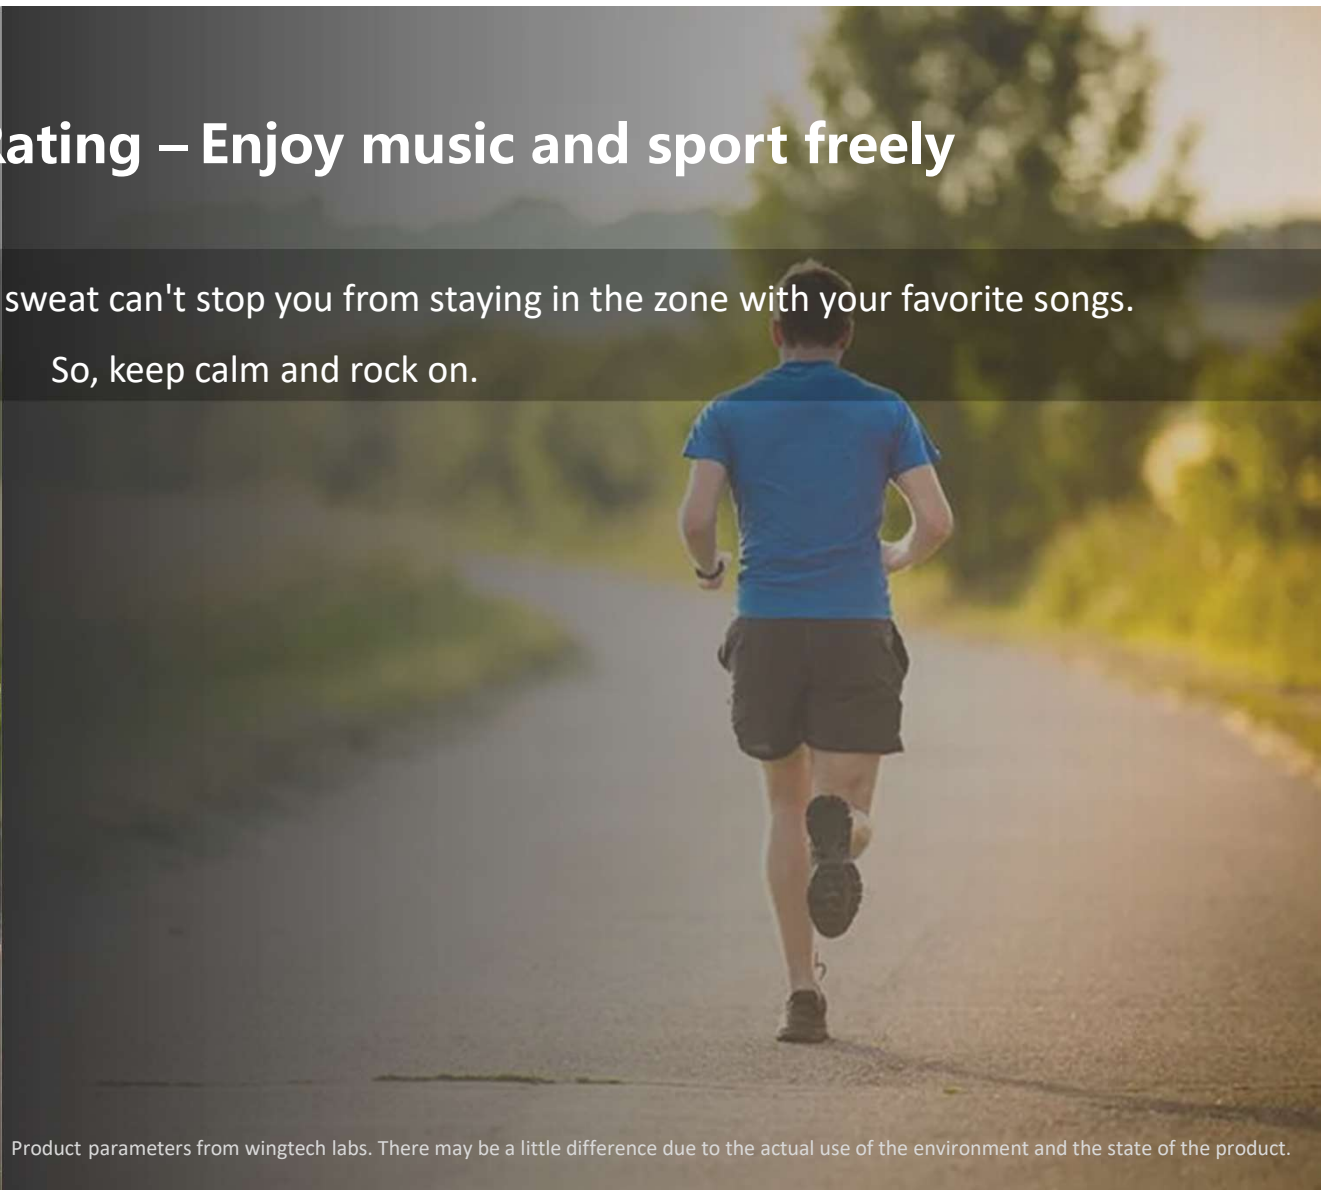

Dual-mic AI ENC Noise Reduction Principle
