NEW CDR RANGE

Every day is an opportunity unknown and the beginning of something beautiful. To make the most of your day, all you need is a great, energetic start to your morning.

Racold has helped you begin your day with this spurt of refreshing energy for the last 60 years. A fully owned subsidiary of Ariston Thermo Group, the world's leading thermic solutions company. Racold is the largest provider of water heating solutions and India's most trusted brand (as per Brand Trust Report 2016). Racold is the first water heater brand in India to be recognized by the Bureau of Energy Efficiency (BEE) successively for 9 years. It has won the "Energy Conservation Award" from 2010 to 2016 followed by the "Most Energy Efficient Appliance of the Year" award in 2017 and 2018. Racold, is the only brand in the water heating category to be chosen as a Superbrand for 2019 after an extensive online consumer voting process.

CDR DLX is equipped with Titanium Plus technology with titanium enamel coating which provides high durability and superior withstanding power. The range comes with 5-Star energy efficiency label.

CDR Swift is the power packed water heater charged with 3kW water heating element, which ensures you get hot water in no time. Its compact design, with options of vertical and horizontal fittings makes it perfect choice for your urban bath space. Now, enjoy 33% faster water heating** with the new CDR Swift.

Titanium enamel coating provides extreme protection from corrosion and durability, compression and pressure resistance.

The inbuilt powerful heating element helps heat the water 33% quicker, resulting in extra saving of time each morning.

A special anode used with the heating element employs an electrolytic process that protects the heating element from corrosion, thus greatly enhancing its life.

Rust proof body to prevent corrosion leaving no room for rust, ensuring its longer life.

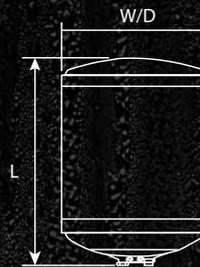

Provides three levels of safety against high temperature and pressure with thermostat, cutout and safety valve.

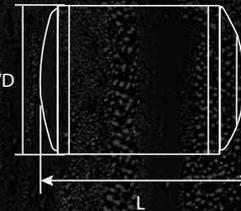

Its high pressure withstanding capacity (8 Bar) makes it suitable for high-rise buildings and high-pressure pump applications.
