Troubleshooting

What can I do to solve a problem?

Power/Charging

- The headset is not turned on.
- Charging cannot be done.
- Charging time is too long.
- The headset cannot be recognized by a computer.
- The remaining battery charge of the headset is not displayed on the screen of an iPhone or iPod touch.

Sound

- No sound
- Low sound level
- There is a difference in volume between the left and right sides, insufficient low-frequency sound.
- Low sound quality
- Sound skips frequently.
- The noise canceling effect is not sufficient.

Bluetooth

- Pairing cannot be done.
- One-touch connection (NFC) does not work.
- Unable to make a Bluetooth connection.
- Distorted sound

- The Bluetooth wireless communication range is short, or the sound skips.
- The headset does not operate properly.
- Cannot hear a person on a call.
- Low voice from callers

Resetting or initializing the headset

- Resetting the headset
- Initializing the headset to restore factory settings

Wireless Noise Canceling Stereo Headset
WI-C600N

What you can do with the Bluetooth function

The headset uses BLUETOOTH® wireless technology, allowing you to listen to music or make phone calls wirelessly.

Listening to music

You can receive audio signals from a smartphone or music player to enjoy music wirelessly.

Talking on the phone

You can make and receive a call hands-free, while leaving your smartphone or mobile phone in your bag or pocket.

Wireless Noise Canceling Stereo Headset
WI-C600N

About voice guidance

In the factory setting, you will hear the English voice guidance in the following situations via the headset.
You can change the language of the voice guidance and turn on/off the voice guidance using “Sony | Headphones Connect” app. For more details, refer to the following URL:
https://rd1.sony.net/help/mdr/hpc/h_zz/

- When powering on: “Power on”
- When powering off: “Power off”
- When entering pairing mode: “Bluetooth pairing”
- When establishing a Bluetooth connection: “Bluetooth connected”
- When disconnecting a Bluetooth connection: “Bluetooth disconnected”
- When checking the remaining battery charge: “Battery about XX %” (The “XX” value indicates the approximate remaining charge. Use it as a rough estimate.) / “Battery fully charged”
- When the remaining battery charge is low: “Low battery, please recharge headset”
- When automatically turning off due to low battery: “Please recharge headset. Power off”
- When turning on the noise canceling function: “Noise canceling”
- When turning on the Ambient Sound Mode: “Ambient sound”
- When turning off the noise canceling function and the Ambient Sound Mode: “Ambient Sound Control off”
- When the Google Assistant is not available on the smartphone connected to the headset even if you press the Google Assistant button on the headset: “The Google Assistant is not connected”
- When Amazon Alexa is not available on the smartphone connected to the headset even if you press the Amazon Alexa button on the headset: “Either your mobile device isn't connected; or you need to open the Alexa App and try again”

Note

- Even if you initialize the headset to restore the factory settings after changing the language of voice guidance, the language will not be changed.
- If the voice guidance is not heard after changing the voice guidance language or updating the firmware, turn the headset off and on again.

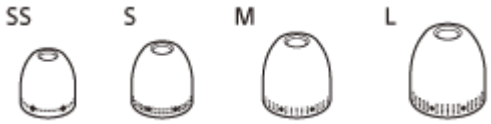
Checking the package contents

After opening the package, check that all of the items in the list are included. If any items are missing, contact your dealer.
Numbers in ( ) indicate the item amount.

Wireless Noise Canceling Stereo Headset
USB Type-C™ cable (USB-A to USB-C™) (approx. 20 cm (7 7/8 in.))(1)

Long Hybrid silicone rubber earbuds (SS/S/M/L 2 each)

- The size M earbuds come attached to the headset.



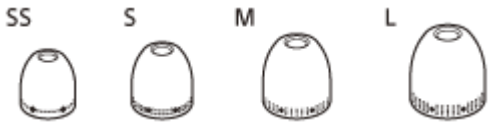
4-739-218-11(4) Copyright 2018 Sony Corporation

Wireless Noise Canceling Stereo Headset
WI-C600N

Replacing the earbuds

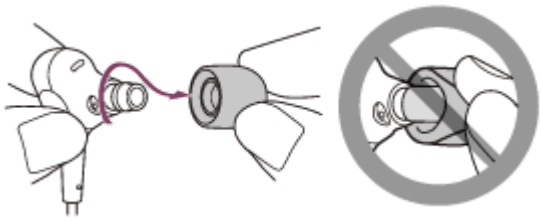
Size M earbuds come attached to the headset. If the earbuds tend to come off or you feel that there is insufficient low frequency sound and a difference in volume between the left and right sides, change them to another size to comfortably and snugly fit your left and right ears.

Long hybrid silicone rubber earbuds



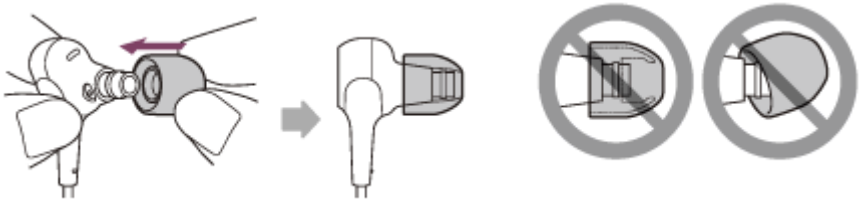
SS: 1 line
S: 2 lines
M: 3 lines
L: 4 lines

1. **Remove the earbuds.**



- Do not pinch the end of the earbud when removing it.

2. **Attach the earbuds.**



- Firmly insert the earbuds all the way. Do not attach the earbuds in a loose or skewed manner.

Wireless Noise Canceling Stereo Headset
WI-C600N

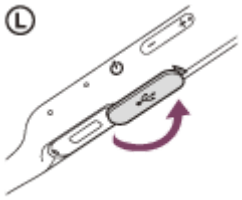
Charging the headset

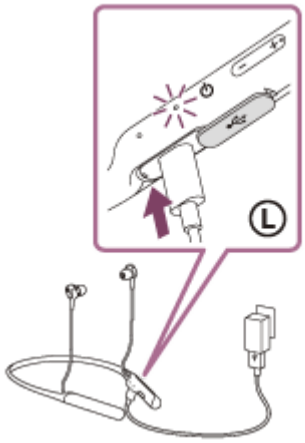
The headset contains a built-in lithium-ion rechargeable battery. Use the supplied USB Type-C cable to charge the headset before use.

1 Open the USB Type-C port cover.



2 Connect the headset and an AC outlet.

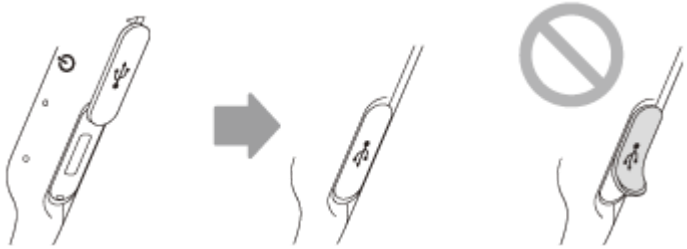
Use the USB Type-C cable (supplied) and a USB AC adapter (sold separately) to connect the headset to an AC outlet.



- The indicator (red) of the headset lights up.
- Charging is completed in about 2.5 hours (*) and the indicator (red) automatically turns off.

* Time required for charging the empty battery to its full capacity. The charging time may differ depending on the conditions of use.

After charging is complete, disconnect the USB Type-C cable and close the USB port cover securely to prevent water or dust from entering the headset.



Hint

- You can also use the supplied USB Type-C cable to connect to a running computer to charge the headset.

- If charging starts while the headset is turned on, the headset will turn off automatically.

Note

- Charging may not be successful with cables other than the supplied USB Type-C cable.
- Charging may not be successful depending on the type of USB AC adapter.
- When the headset is connected to an AC outlet or computer, all operations such as turning on the headset, registering or connecting to Bluetooth devices, and music playback cannot be performed.
- The headset cannot be charged when the computer is in standby (sleep) or hibernation mode. In this case, change the computer settings to charge the headset once again.
- If the headset is not used for a long time, the rechargeable battery usage hours may be reduced. However, the battery life will improve after a few recharges.
- If you store the headset for a long time, charge the battery to its full capacity once every 6 months to avoid over-discharge.
- If the headset is not used for a long time, it may take longer to charge the battery.
- If the headset detects a problem while charging due to the following causes, the indicator (red) flashes. In this case, charge once again within the charging temperature range. If the problem persists, consult with your Sony dealer.
  - Ambient temperature exceeds the charging temperature range of 5 °C – 35 °C (41 °F - 95 °F).
  - There is a problem with the battery.
- If the headset is not used for a long time, the indicator (red) may not light up when charging. Please wait a moment until the indicator (red) lights up.
- If the usage hours of the built-in rechargeable battery decreases significantly, the battery should be replaced. Consult with your nearest Sony dealer to replace the rechargeable battery.
- Avoid exposure to extreme temperature changes, direct sunlight, moisture, sand, dust, and electrical shock. Never leave the headset in a parked vehicle.
- When connecting to a computer, use only the supplied USB Type-C cable, and be sure to directly connect them. Charging will not be properly completed through an indirect connection such as a USB hub.

4-739-218-11(4) Copyright 2018 Sony Corporation

Wireless Noise Canceling Stereo Headset
WI-C600N

Available operating time

The available operating times of the headset on a fully-charged battery are as follows:

Bluetooth connection

Music Playback time

Codec	DSEE	Noise canceling function/Ambient Sound Mode	Available operating time
Qualcomm® aptX™ audio	AUTO/OFF	Noise canceling function: ON	Max. 5.5 hours
		Ambient Sound Mode: ON	Max. 5.5 hours
		OFF	Max. 6.5 hours
AAC/SBC	AUTO	Noise canceling function: ON	Max. 5.5 hours
		Ambient Sound Mode: ON	Max. 5.5 hours
		OFF	Max. 6.5 hours
	OFF	Noise canceling function: ON	Max. 6.5 hours
		Ambient Sound Mode: ON	Max. 6.5 hours
		OFF	Max. 7.5 hours

- About 60 minutes of music playback is possible after 15 minutes charging.

Communication time

Noise canceling function/Ambient Sound Mode	Available operating time
Noise canceling function: ON	Max. 7.5 hours
Ambient Sound Mode: ON	Max. 7.5 hours
OFF	Max. 8.5 hours

Standby time

Noise canceling function/Ambient Sound Mode	Available operating time
Noise canceling function: ON	Max. 22 hours
Ambient Sound Mode: ON	Max. 22 hours
OFF	Max. 200 hours

Hint

- By using the “Sony | Headphones Connect” app, you can check which codec is used for a connection or switch the DSEE function.

Note

- Usage hours may be different depending on the settings and conditions of use.

Wireless Noise Canceling Stereo Headset
WI-C600N

Checking the remaining battery charge

You can check the remaining battery charge of the rechargeable battery.

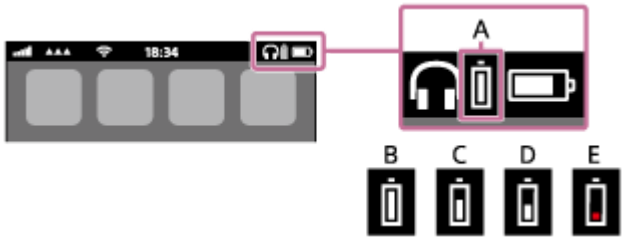
When the ⏻ button is pressed while the headset power is on, the voice guidance indicating the remaining battery charge can be heard.
“Battery about XX %” (The “XX” value indicates the approximate remaining charge.)
“Battery fully charged”
The remaining battery charge indicated by the voice guidance may differ from the actual remaining charge in some cases. Please use it as a rough estimate.
In addition, the red indicator flashes (about 15 seconds) if the remaining battery charge is low when the headset is turned on.

When the remaining charge is low

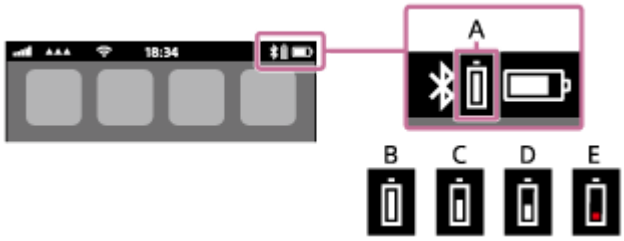
The currently operating indicator display changes to red. If you hear the voice guidance say, “Low battery, please recharge headset”, charge the headset as soon as possible.
When the battery becomes completely empty, the headset sounds a warning beep, the voice guidance says, “Please recharge headset. Power off”, and the headset automatically turns off.

When you are using an iPhone or iPod touch

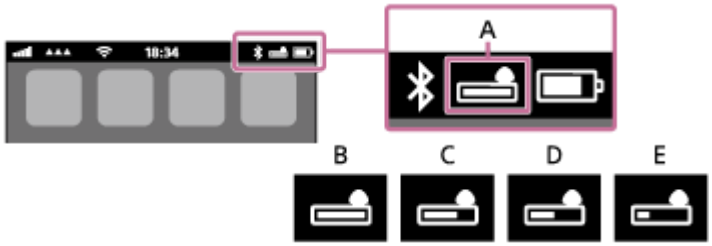
When the headset is connected to an iPhone or iPod touch (iOS) that supports HFP (Hands-free Profile), it will show an icon that indicates the remaining battery charge of the headset on the screen.
Usable devices
iPhone or iPod touch which supports HFP (Hands-free Profile)(iOS 5.0 or later)
iOS 10.2 or later



iOS 7.0 or later



iOS 5.X / 6.X



A: Remaining battery charge of the headset
B: 100% - 70%
C: 70% - 50%
D: 50% - 20%
E: 20% or lower (needs to charge)

The remaining battery charge of the headset is also displayed on the widget of an iPhone or iPod touch running iOS 9 or later.
Furthermore, the remaining charge which is displayed may differ from the actual remaining charge in some cases. Please use it as a rough estimate.

Hint

- You can also check the remaining battery charge with the “Sony | Headphones Connect” app. Android smartphones and the iPhone/iPod touch both support this app.

Note

- If you connect the headset to an iPhone or iPod touch with “Media audio” (A2DP) only in a multipoint connection, the remaining battery charge will not be displayed correctly.
- The remaining battery charge may not be properly displayed immediately after a software update or if the headset has not been used for a long time. In this case, repeatedly charge and discharge the battery multiple times to properly display the remaining battery charge.

How to make a wireless connection to Bluetooth devices

You can enjoy music and hands-free calling with the headset wirelessly by using your device’s Bluetooth function.

Device registration (pairing)

To use the Bluetooth function, both of the connecting devices must be registered in advance. The operation to register a device is called device registration (pairing).
If the device to be connected does not support the one-touch connection (NFC), operate the headset and the device to perform device registration (pairing).
If the device supports one-touch connection (NFC), you can just touch to perform device registration (pairing) and establish a Bluetooth connection.

Connecting the headset to a registered (paired) device

Once a device is registered (paired), it is not necessary to register it again. Connect to a device that is already registered (paired) with the headset using the appropriate method.

4-739-218-11(4) Copyright 2018 Sony Corporation

Wireless Noise Canceling Stereo Headset
WI-C600N

Connecting with the "Sony | Headphones Connect" app

Launch the "Sony | Headphones Connect" app on your Android™ smartphone/iPhone to connect the headset to a smartphone or iPhone. For more details, refer to the "Sony | Headphones Connect" app help guide.
https://rd1.sony.net/help/mdr/hpc/h_zz/

Note

- The connection with some smartphones and iPhones may become unstable when connecting using the "Sony | Headphones Connect" app. In that case, follow the procedures in “Connecting to a paired Android smartphone,” or “Connecting to a paired iPhone” to connect to the headset.

Related Topic

Wireless Noise Canceling Stereo Headset
WI-C600N

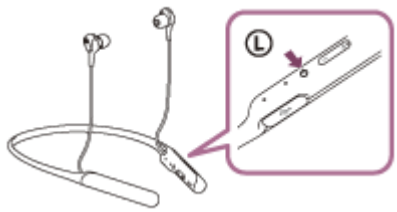
Pairing and connecting with an Android smartphone

The operation to register the device that you wish to connect to is called pairing. First, pair a device to use it with the headset for the first time.
Before you start the pairing operation, make sure that:

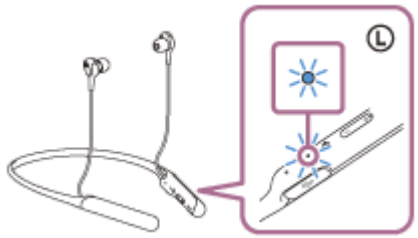
- The Android smartphone is placed within 1 m (3 feet) of the headset.
- The headset is charged sufficiently.
- The operating instructions of the smartphone is in hand.

1 Enter pairing mode on this headset.

Turn on the headset when you pair the headset with a device for the first time after you bought it or after you initialized the headset (the headset has no pairing information). The headset enters pairing mode automatically. When you pair a 2nd or subsequent device (the headset has pairing information for other devices), press and hold the ⏻ button for about 7 seconds.



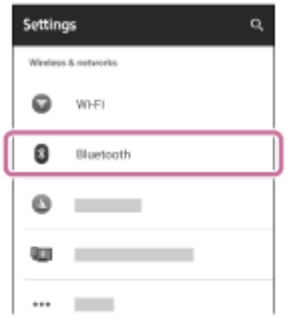
Check that the blue indicator repeatedly flashes 2 times in a row. You will hear a voice guidance “Bluetooth pairing”.



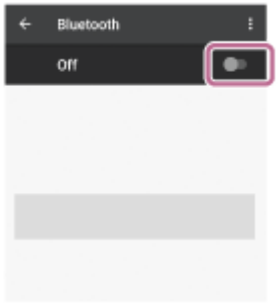
2 Unlock the screen of the Android smartphone if it is locked.

3 Search for the headset on the Android smartphone.

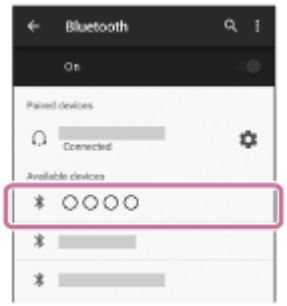
1. Select [Settings] - [Wireless & networks] - [Bluetooth].



2. Touch [ ] next to [Bluetooth] to turn on the Bluetooth function.



4 **Touch [WI-C600N].**



If passkey (*) input is required on the display of the smartphone, input “0000.”
The headset and smartphone are paired and connected with each other. You will hear a voice guidance “Bluetooth connected”.
If they are not connected, see “Connecting to a paired Android smartphone”.
If [WI-C600N] does not appear on the Android smartphone screen, try again from step 3.

* A Passkey may be called “Passcode,” “PIN code,” or “Password.”

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your Android smartphone.
- To delete all pairing information, see “Initializing the headset to restore factory settings”.

Note

- When registering a device (pairing), either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If pairing is not established within 5 minutes, the pairing mode is canceled, and the headset turns off. In this case, start the operation over from step 1.
- Once Bluetooth devices are paired, there is no need to pair them again, except in the following cases:
  - Pairing information has been deleted after repair, etc.
  - When a 9th device is paired
    The headset can be paired with up to 8 devices. If a new device is paired after 8 devices are already paired, the registration information of the paired device with the oldest connection date is overwritten with the information for the new device.
  - When the pairing information for the headset has been deleted from the Bluetooth device.
  - When the headset is initialized
    All of the pairing information is deleted. In this case, delete the pairing information for the headset from the Bluetooth device and then pair them again.
- The headset can be paired with multiple devices, but can only play music from one paired device at a time.

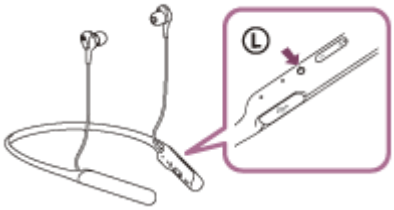
Wireless Noise Canceling Stereo Headset
WI-C600N

Connecting to a paired Android smartphone

1 Unlock the screen of the Android smartphone if it is locked.

2 Turn on the headset.

Press and hold the ⏻ button for about 2 seconds.

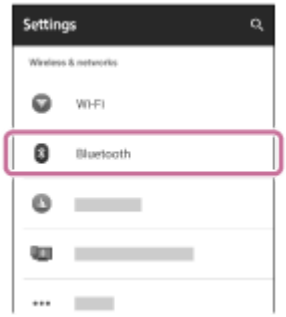


Check that the indicator continues to flash blue after you release your finger from the button. You will hear a voice guidance “Power on”.

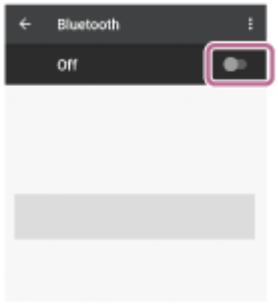
After the headset turns on, if it has automatically connected to the last connected device, you will hear a voice guidance “Bluetooth connected”.
Check the connection status on the Android smartphone. If it is not connected, proceed to step 3.

3 Display the devices paired with the Android smartphone.

1. Select [Settings] - [Wireless & networks] - [Bluetooth].

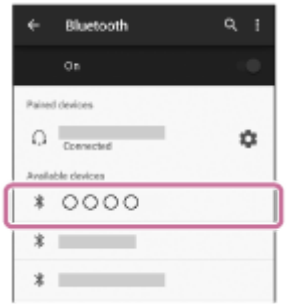


2. Touch [ ] next to [Bluetooth] to turn on the Bluetooth function.



4 **Touch [WI-C600N].**

You will hear a voice guidance “Bluetooth connected”.



Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your Android smartphone.

Note

- When connecting, either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If the last-connected Bluetooth device is placed near the headset, the headset may connect automatically to the device by simply turning on the headset. In that case, deactivate the Bluetooth function on the device or turn off the power.
- If you cannot connect your smartphone to the headset, delete the headset pairing information on your smartphone and perform the pairing again. As for the operations on your smartphone, refer to the operating instructions supplied with your smartphone.

WI-C600N

One-touch connection (NFC) with an Android smartphone (Android 4.1 or later)

By touching the headset with a smartphone, the headset turns on automatically and then pairs and makes a Bluetooth connection.

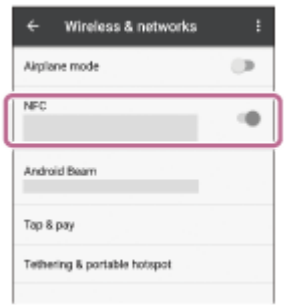
Compatible smartphones
NFC -compatible smartphones installed with Android 4.1 or later.

NFC
NFC (Near Field Communication) is a technology enabling short-range wireless communication between various devices, such as smartphones and IC tags. Thanks to the NFC function, data communication — for example, Bluetooth pairing — can be achieved easily by simply touching NFC -compatible devices together (i.e., at the N -Mark symbol or location designated on each device).

1 Unlock the screen of the smartphone if it is locked.

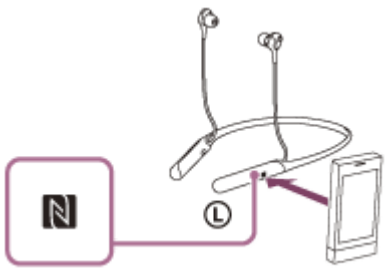
2 Turn on the smartphone’s NFC function.

1. Select [Settings] - [Wireless & networks] - [More].
2. Touch [ ] next to [NFC] to turn on the NFC function.



3 Touch the headset with the smartphone.

- Touch the smartphone on the N-Mark of the headset. Keep touching the headset with the smartphone until the smartphone reacts.
- Refer to the operating instructions of the smartphone for the designated location to be touched on the smartphone.



Follow the on-screen instructions to complete the pairing and connection.
When the headset is connected with the smartphone, the indicator (blue) starts flashing slowly. You will hear a voice guidance “Bluetooth connected”.

- To disconnect, touch the smartphone again.
- To connect a paired smartphone, perform step 3.
- Unlock the screen of the smartphone if it is locked.

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your Android smartphone.
- If you cannot connect the headset, try the following.
  - Unlock the screen of the smartphone if it is locked, and move the smartphone slowly over the N-Mark.
  - If the smartphone is in a case, remove the case.
  - Check that the Bluetooth function of the smartphone is enabled.
- If you touch an NFC-compatible smartphone with the headset, the smartphone terminates Bluetooth connection with any current device, and connects to the headset (One-touch connection switching).

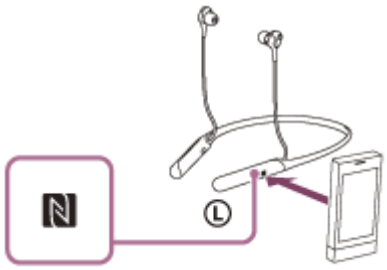
Disconnecting the Android smartphone with one-touch (NFC)

You can disconnect the headset from the connected smartphone by touching the headset with it.

1. **Unlock the screen of the smartphone if it is locked.**

2. **Touch the headset with the smartphone.**

   Touch the smartphone to the N-Mark on the headset. You will hear a voice guidance “Bluetooth disconnected”.



Note

- Under the settings at the time of purchase, if no operations are performed for about 5 minutes after disconnecting, the headset automatically turns off. Press and hold the ⏻ button for about 2 seconds to turn off the power before that time. You will hear a voice guidance “Power off”, the blue indicator turns off, and the headset powers off.
  The time when the power turns off can be changed in the “Sony | Headphones Connect” app. For more details, refer to the "Sony | Headphones Connect" app help guide.

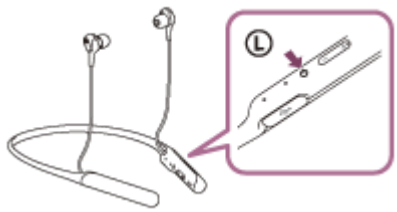
Pairing and connecting with an iPhone

The operation to register the device that you wish to connect to is called pairing. First, pair a device to use it with the headset for the first time.
Before you start the pairing operation, make sure that:

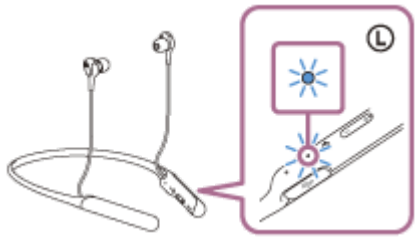
- The iPhone is placed within 1 m (3 feet) of the headset.
- The headset is charged sufficiently.
- The operating instructions of the iPhone is in hand.

1 Enter pairing mode on this headset.

Turn on the headset when you pair the headset with a device for the first time after you bought it or after you initialized the headset (the headset has no pairing information). The headset enters pairing mode automatically. When you pair a 2nd or subsequent device (the headset has pairing information for other devices), press and hold the ⏻ button for about 7 seconds.



Check that the blue indicator repeatedly flashes 2 times in a row. You will hear a voice guidance “Bluetooth pairing”.

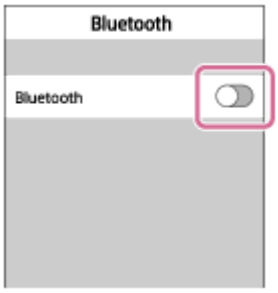


2 Unlock the screen of the iPhone if it is locked.

3 Select the Bluetooth setting on the iPhone.

1. Select [Settings].
2. Touch [Bluetooth].

3. Touch [◯] to change it to [◉] (turn on the Bluetooth function).



4 **Touch [WI-C600N].**

If passkey (*) input is required on the display of the iPhone, input “0000.”
The headset and iPhone are paired and connected with each other. You will hear a voice guidance “Bluetooth connected”.
If they are not connected, see “Connecting to a paired iPhone”.
If [WI-C600N] does not appear on the display, try again from step 3.

* A Passkey may be called “Passcode,” “PIN code,” or “Password.”

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your iPhone.
- To delete all Bluetooth pairing information, see “Initializing the headset to restore factory settings”.

Note

- When registering a device (pairing), either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If pairing is not established within 5 minutes, pairing mode is canceled, and the headset turns off. In this case, start the operation over from step 1.
- Once Bluetooth devices are paired, there is no need to pair them again, except in the following cases:
  - Pairing information has been deleted after repair, etc.
  - When a 9th device is paired.
    The headset can be paired with up to 8 devices. If a new device is paired after 8 devices are already paired, the registration information of the paired device with the oldest connection date is overwritten with the information for the new device.
  - When the pairing information for the headset has been deleted from the Bluetooth device.
  - When the headset is initialized.
    All of the pairing information is deleted. In this case, delete the pairing information for the headset from the device and then pair them again.
- The headset can be paired with multiple devices, but can only play music from one paired device at a time.

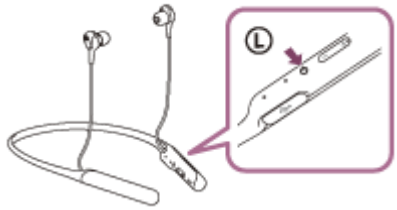
Connecting to a paired iPhone

1 Unlock the screen of the iPhone if it is locked.

2 Turn on the headset.

Press and hold the ⏻ button for about 2 seconds.



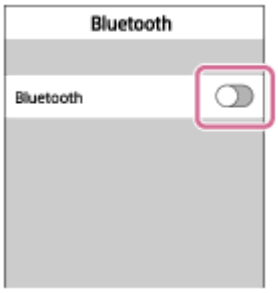
Check that the blue indicator continues to flash after you release your finger from the button. You hear the voice guidance “Power on”.

After the headset turns on, if it has automatically connected to the last connected device, you will hear a voice guidance “Bluetooth connected”.
Check the connection status on the iPhone. If it is not connected, proceed to step 3.

3 Display the devices paired with the iPhone.

1. Select [Settings].
2. Touch [Bluetooth].

3. Touch [◯] to change it to [◉] (turn on the Bluetooth function).



4 **Touch [WI-C600N].**

You will hear a voice guidance “Bluetooth connected”.

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your iPhone.

Note

- When connecting, either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If the last-connected Bluetooth device is placed near the headset, the headset may connect automatically to the device by simply turning on the headset. In that case, deactivate the Bluetooth function on the device or turn off the power.
- If you cannot connect your iPhone to the headset, delete the headset pairing information on your iPhone and perform the pairing again. As for the operations on your iPhone, refer to the operating instructions supplied with your iPhone.

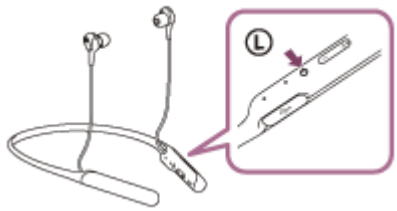
Pairing and connecting with a computer (Windows 10)

The operation to register the device that you wish to connect to is called pairing. First, pair a device to use it with the headset for the first time.
Before you start the pairing operation, make sure that:

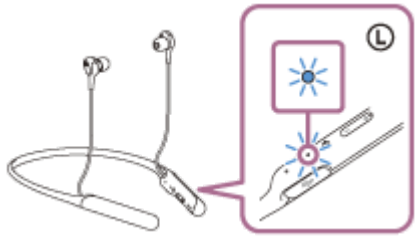
- Your computer has a Bluetooth function that supports music playback connections (A2DP).
- The computer is placed within 1 m (3 feet) of the headset.
- The headset is charged sufficiently.
- The operating instructions of the computer is in hand.
- Depending on the computer you are using, the built-in Bluetooth adapter may need to be turned on. If you do not know how to turn on the Bluetooth adapter or are unsure if your computer has a built-in Bluetooth adapter, refer to the operating instructions supplied with the computer.

1 Enter pairing mode on this headset.

Turn on the headset when you pair the headset with a device for the first time after you bought it or after you initialized the headset (the headset has no pairing information). The headset enters pairing mode automatically. When you pair a 2nd or subsequent device (the headset has pairing information for other devices), press and hold the ⏻ button for about 7 seconds.



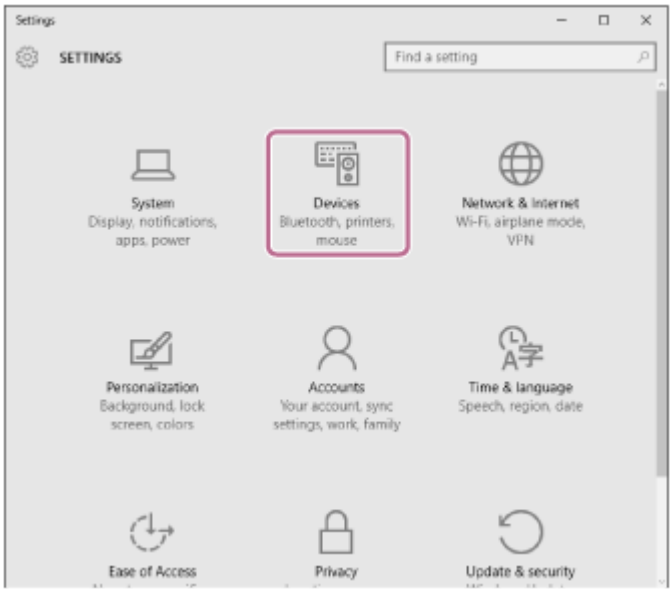
Check that the blue indicator repeatedly flashes 2 times in a row. You will hear a voice guidance “Bluetooth pairing”.



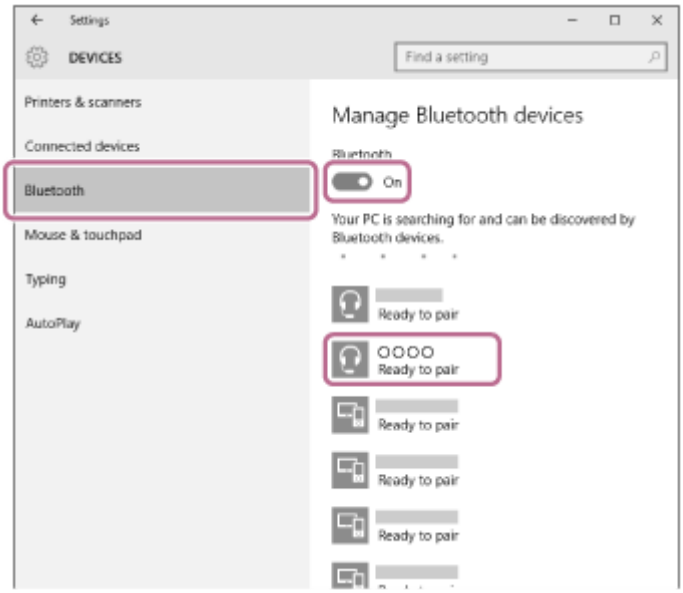
2 Wake the computer up from sleep mode.

3 Register the headset using the computer.

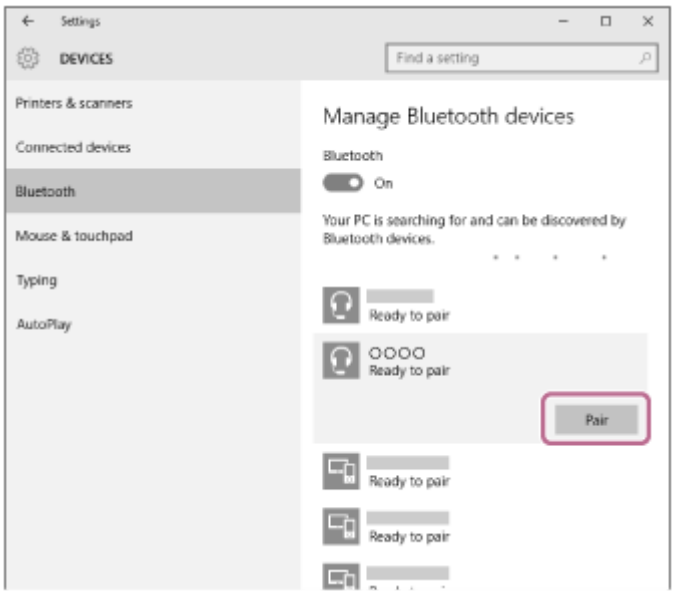
1. Click the [Start] button, then [Settings].
2. Click [Devices].



3. Click the [Bluetooth] tab, then click the [Bluetooth] button to turn on the Bluetooth function.



4. Select [WI-C600N], then click [Pair].



If passkey (*) input is required on the display of the computer, input “0000.”
The headset and computer are paired and connected with each other. You will hear a voice guidance “Bluetooth connected”.

If they are not connected, see “Connecting to a paired computer (Windows 10)”
If [WI-C600N] does not appear on the display, try again from step 3.

* A Passkey may be called “Passcode,” “PIN code,” or “Password.”

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your computer.
- To delete all pairing information, see “Initializing the headset to restore factory settings”.

Note

- When registering a device (pairing), either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If pairing is not established within 5 minutes, pairing mode is canceled, and the headset turns off. In this case, start the operation over from step 1.
- Once Bluetooth devices are paired, there is no need to pair them again, except in the following cases:
  - Pairing information has been deleted after repair, etc.
  - When a 9th device is paired
    The headset can be paired with up to 8 devices. If a new device is paired after 8 devices are already paired, the registration information of the paired device with the oldest connection date is overwritten with the information for the new device.
  - When the pairing information for the headset has been deleted from the Bluetooth device.
  - When the headset is initialized
    All of the pairing information is deleted. In this case, delete the pairing information for the headset from the device and then pair them again.
- The headset can be paired with multiple devices, but can only play music from one paired device at a time.

Pairing and connecting with a computer (Mac)

The operation to register the device that you wish to connect to is called pairing. First, pair a device to use it with the headset for the first time.

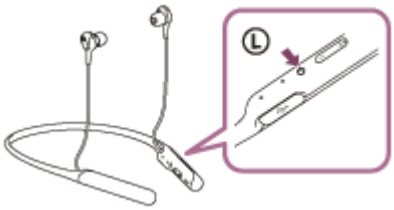
Compatible OS

macOS High Sierra (version 10.13)
Before you start the pairing operation, make sure that:

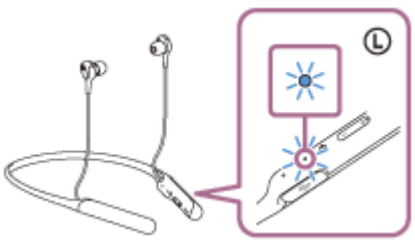
- Your computer has a Bluetooth function that supports music playback connections (A2DP).
- The computer is placed within 1 m (3 feet) of the headset.
- The headset is charged sufficiently.
- The operating instructions of the computer is in hand.
- Depending on the computer you are using, the built-in Bluetooth adapter may need to be turned on. If you do not know how to turn on the Bluetooth adapter or are unsure if your computer has a built-in Bluetooth adapter, refer to the operating instructions supplied with the computer.
- Set the computer speaker to the ON mode.
  If the computer speaker is set to the "OFF" mode, no sound is heard from the headset.
  Computer speaker in the ON mode

1 Enter pairing mode on this headset.

Turn on the headset when you pair the headset with a device for the first time after you bought it or after you initialized the headset (the headset has no pairing information). The headset enters pairing mode automatically. When you pair a 2nd or subsequent device (the headset has pairing information for other devices), press and hold the button for about 7 seconds.



Check that the blue indicator repeatedly flashes two times in a row. You will hear a voice guidance “Bluetooth pairing”.



2 Wake the computer up from sleep mode.

3 Register the headset using the computer.

1. Select [(System Preferences)] - [Bluetooth] from the task bar in the lower right part of the screen.

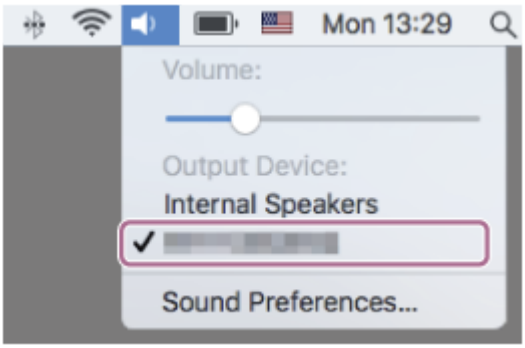
2. Select [WI-C600N] from the Bluetooth screen and click [Connect].

If passkey (*) input is required on the display of the computer, input “0000.”
The headset and computer are paired and connected with each other. You will hear a voice guidance “Bluetooth connected”.
If they are not connected, see “Connecting to a paired computer (Mac)”.
If [WI-C600N] does not appear on the display, try again from step 3.

* A Passkey may be called “Passcode,” “PIN code,” or “Password.”

4 Click the speaker icon in the upper right part of the screen and select [WI-C600N].

Now you are ready to enjoy music playback on your computer.



Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your computer.

- To delete all pairing information, see “Initializing the headset to restore factory settings”.

Note

- When registering a device (pairing), either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If pairing is not established within 5 minutes, pairing mode is canceled, and the headset turns off. In this case, start the operation over from step 1.
- Once Bluetooth devices are paired, there is no need to pair them again, except in the following cases:
  - Pairing information has been deleted after repair, etc.
  - When a 9th device is paired
    The headset can be paired with up to 8 devices. If a new device is paired after 8 devices are already paired, the registration information of the paired device with the oldest connection date is overwritten with the information for the new device.
  - When the pairing information for the headset has been deleted from the Bluetooth device.
  - When the headset is initialized
    All of the pairing information is deleted. In this case, delete the pairing information for the headset from the device and then pair them again.
- The headset can be paired with multiple devices, but can only play music from one paired device at a time.

Connecting to a paired computer (Windows 10)

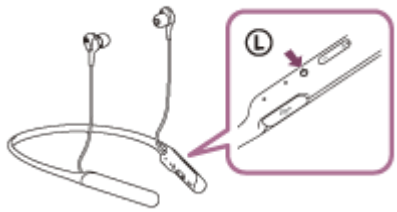
Before starting the operation, make sure of the following:

- Depending on the computer you are using, the built-in Bluetooth adapter may need to be turned on. If you do not know how to turn on the Bluetooth adapter or are unsure if your computer has a built-in Bluetooth adapter, refer to the operating instructions supplied with the computer.

1 Wake the computer up from sleep mode.

2 Turn on the headset.

Press and hold the ⏻ button for about 2 seconds.

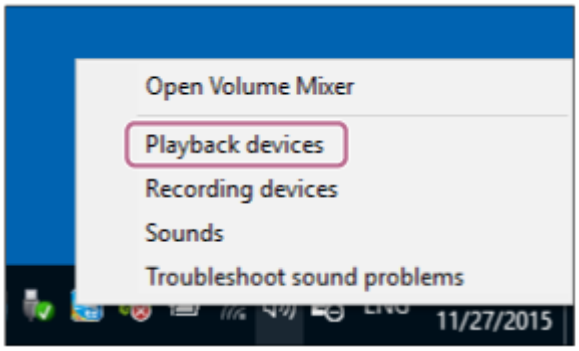


Check that the indicator continues to flash blue after you release your finger from the button. You hear the voice guidance “Power on”.

After the headset turns on, if it has automatically connected to the last connected device, you will hear a voice guidance “Bluetooth connected”.
Use the computer to check whether the connection is established, and if it is not established, proceed to step 3.
If the computer has connected to the last Bluetooth device connected, disconnect it, then proceed to the next step.

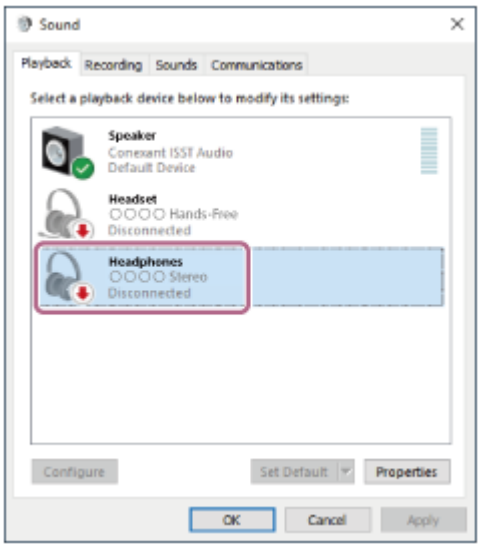
3 Select the headset using the computer.

1. Right-click the volume icon on the windows toolbar, then click [Playback devices].

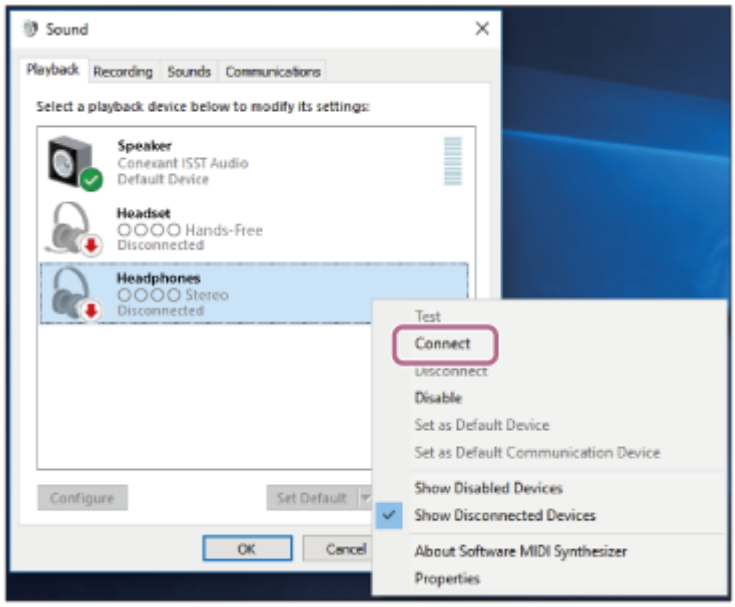


Right-click [WI-C600N].

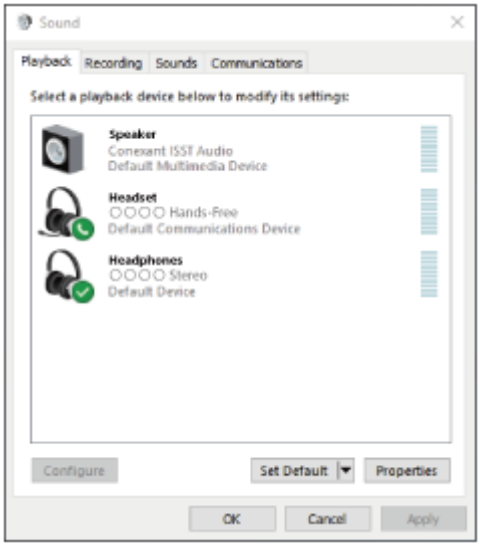
2. If [WI-C600N] is not displayed, right-click on the [Sound] screen, then select [Show Disconnected Devices].



3. Click [Connect].



The connection is established.



Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your computer.

Note

- When connecting, either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If the music playback sound quality is poor, check that the A2DP function which supports music playback connections is enabled in the computer settings. For more details, refer to the operating instructions supplied with your computer.
- If the last-connected Bluetooth device is placed near the headset, the headset may connect automatically to the device by simply turning on the headset. In that case, deactivate the Bluetooth function on the device or turn off the power.
- If you cannot connect your computer to the headset, delete the headset pairing information on your computer and perform the pairing again. As for the operations on your computer, refer to the operating instructions supplied with your computer.

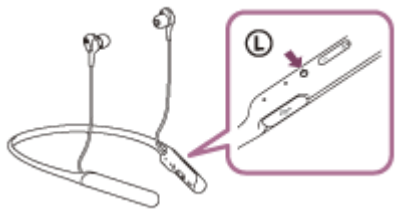
Pairing and connecting with other Bluetooth devices

The operation to register the device that you wish to connect to is called pairing. First, pair a device to use it with the headset for the first time.
Before you start the pairing operation, make sure that:

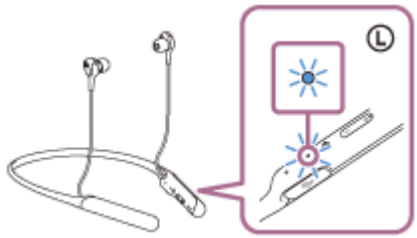
- The Bluetooth device is placed within 1 m (3 feet) of the headset.
- The headset is charged sufficiently.
- The operating instructions of the Bluetooth device is in hand.

1 Enter pairing mode on this headset.

Turn on the headset when you pair the headset with a device for the first time after you bought it or after you initialized the headset (the headset has no pairing information). The headset enters pairing mode automatically. When you pair a 2nd or subsequent device (the headset has pairing information for other devices), press and hold the ⏻ button for about 7 seconds.



Check that the blue indicator repeatedly flashes 2 times in a row. You will hear a voice guidance “Bluetooth pairing”.



2 Perform the pairing procedure on the Bluetooth device to search for this headset.

[WI-C600N] will be displayed on the list of detected devices on the screen of the Bluetooth device.
If it is not displayed, repeat from step 1.

3 Select [WI-C600N] displayed on the screen of the Bluetooth device for pairing.

If passkey (*) input is required on the display of the computer, input “0000.”

* A Passkey may be called “Passcode,” “PIN code,” or “Password.”

4 Make the Bluetooth connection from the Bluetooth device.

Some devices automatically connect with the headset when the pairing is complete. You will hear a voice guidance “Bluetooth connected”.

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your Bluetooth device.
- To delete all Bluetooth pairing information, see “Initializing the headset to restore factory settings”.

Note

- When registering a device (pairing), either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If pairing is not established within 5 minutes, pairing mode is canceled, and the headset turns off. In this case, start the operation over from step 1.
- Once Bluetooth devices are paired, there is no need to pair them again, except in the following cases:
  - Pairing information has been deleted after repair, etc.
  - When a 9th device is paired.
    The headset can be paired with up to 8 devices. If a new device is paired after 8 devices are already paired, the registration information of the paired device with the oldest connection date is overwritten with the information for the new device.
  - When the pairing information for the headset has been deleted from the Bluetooth device.
  - When the headset is initialized.
    All of the pairing information is deleted. In this case, delete the pairing information for the headset from the device and then pair them again.
- The headset can be paired with multiple devices, but can only play music from one paired device at a time.

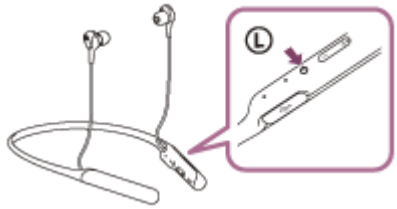
Wireless Noise Canceling Stereo Headset
WI-C600N

Connecting to a paired Bluetooth device

1 Turn on the headset.

Press and hold the ⏻ button for about 2 seconds.



Check that the indicator continues to flash blue after you release your finger from the button. You hear the voice guidance “Power on”.

After the headset turns on, if it has automatically connected to the last connected device, you will hear a voice guidance “Bluetooth connected”.
Check the connection status on the Bluetooth device. If it is not connected, proceed to step 2.

2 Make the Bluetooth connection from the Bluetooth device.

Refer to the operations in the operating instructions supplied with your Bluetooth device. When connected, you will hear a voice guidance “Bluetooth connected”.

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your Bluetooth device.

Note

- When connecting, either [WI-C600N] or [LE_WI-C600N] or both are displayed on the connecting device. If both or [WI-C600N] are displayed touch [WI-C600N], or touch [LE_WI-C600N] if [LE_WI-C600N] is displayed.
- If the last-connected Bluetooth device is placed near the headset, the headset may connect automatically to the device by simply turning on the headset. In that case, deactivate the Bluetooth function on the device or turn off the power.
- If you cannot connect your Bluetooth device to the headset, delete the headset pairing information on your Bluetooth device and perform the pairing again. As for the operations on your Bluetooth device, refer to the operating instructions supplied with your device.

Connecting the headset to both a music player and a smartphone or mobile phone

Multipoint is a function which allows you to connect two Bluetooth devices to the headset and use one device for music playback (A2DP connection) and the other for talking (HFP/HSP connection).
When you wish to use a music player only for music playback and a smartphone only for talking, use a multipoint connection to the headset for each device. The connecting devices must support the Bluetooth function.

1. **Pair the headset with both the music player and the smartphone/mobile phone.**

2. **Connect the headset with the music player.**

   Operate the music player to establish a Bluetooth connection with the headset.

3. **Connect the headset to a smartphone or mobile phone.**

   Operate the smartphone/mobile phone to establish a Bluetooth connection with the headset.

Note

- If the smartphone or mobile phone was connected with the headset the last time, an HFP or HSP connection is automatically established when the headset is turned on, and in some cases an A2DP connection is simultaneously established. In that case, connect from step 2 after disconnecting via smartphone/mobile phone operations.
- When using the Google Assistant, the headset cannot make a multipoint connection.
- When using Amazon Alexa, the headset cannot make a multipoint connection.

4-739-218-11(4) Copyright 2018 Sony Corporation

Wireless Noise Canceling Stereo Headset
WI-C600N

Connecting the headset to 2 Android smartphones

Usually when you connect the headset to a smartphone, the music playback function and the phone call function are both connected simultaneously.
To make a multipoint connection using two smartphones for separately listening to music and making phone calls, change the settings on the smartphone so that only one of the functions is connected.

1. **Pair the headset with both smartphones, respectively.**

2. **Use one of the smartphones to establish a Bluetooth connection with the headset.**

3. **On the smartphone connected to the headset, uncheck either [Call audio] (HFP) or [Media audio] (A2DP).**

   Operation example: When only connecting to a media audio (A2DP)
   Touch [Settings] - [Bluetooth] - the setting icon next to [WI-C600N].

   On the [Paired devices] screen, uncheck [Call audio].

4. **Terminate the Bluetooth connection of the smartphone.**

5. **Use the other smartphone to establish a Bluetooth connection to the headset.**

6. **In the same way, uncheck the function that you did not uncheck in step 3.**

7. **Use the first smartphone to establish a Bluetooth connection again.**

   Both smartphones are connected to the headset with only one function enabled.

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your Android smartphone.

Note

- When using the Google Assistant, the headset cannot make a multipoint connection.
- When using Amazon Alexa, the headset cannot make a multipoint connection.

Wireless Noise Canceling Stereo Headset
WI-C600N

Connecting the headset to an Android smartphone and an iPhone

Usually when you connect the headset to a smartphone, the music playback function and the phone call function are both connected simultaneously.
To make a multipoint connection using an Android smartphone and iPhone for separately listening to music and making phone calls, change the settings on the Android smartphone so that only one of the functions is connected. Connect the Android smartphone before connecting the iPhone.
You cannot set the iPhone to connect one function only.

1. **Pair the headset with both Android smartphone and iPhone, respectively.**

2. **Use the Android smartphone to establish a Bluetooth connection with the headset.**

3. **On the smartphone connected to the headset, uncheck either [Call audio] (HFP) or [Media audio] (A2DP).**

   Operation example: When only connecting to a media audio (A2DP)
   Touch [Settings] - [Bluetooth] - the setting icon next to [WI-C600N].

   On the [Paired devices] screen, uncheck [Call audio].

4. **Use the iPhone to establish a Bluetooth connection to the headset.**

   The iPhone is connected with the function unchecked in step 3.

Hint

- The above procedure is an example. For more details, refer to the operating instructions supplied with your Android smartphone.

Note

- If you connect an Android smartphone with “Call audio” (HFP), the remaining battery charge of the headset will not be correctly displayed on the iPhone screen.

- When using the Google Assistant, the headset cannot make a multipoint connection.
- When using Amazon Alexa, the headset cannot make a multipoint connection.

Disconnecting Bluetooth connection (after use)

1. **Touch the one-touch connection (NFC) compatible device once more to disconnect it. (Unlock the screen of the device if it is locked.) If the Bluetooth device does not support one-touch connection (NFC), operate from the device to disconnect.**

   When disconnected, you will hear a voice guidance “Bluetooth disconnected”.

2. **Turn off the headset.**

   You will hear a voice guidance “Power off”.

Hint

- When you finish playing music, the Bluetooth connection may terminate automatically depending on the Bluetooth device.

Listening to music from a device via Bluetooth connection

If your Bluetooth device supports the following profiles, you can enjoy listening to music and perform basic remote control operation of the Bluetooth device via a Bluetooth connection.

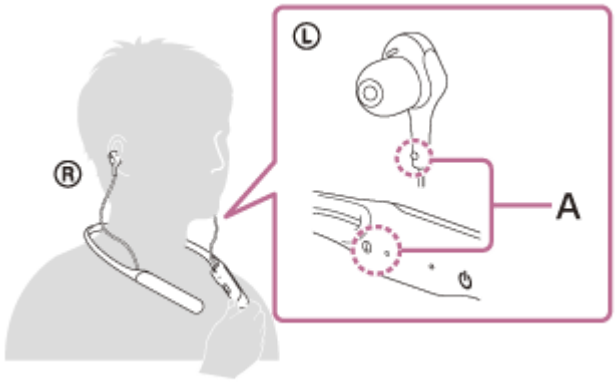
- A2DP（Advanced Audio Distribution Profile）
  You can enjoy high-quality music wirelessly.
- AVRCP（Audio Video Remote Control Profile）
  You can adjust the volume, etc.

The operation may vary depending on the Bluetooth device. Refer to the operating instructions supplied with your Bluetooth device.

1 Connect the headset to a Bluetooth device.

2 Wear the headset.

Place the neckband on your neck so that the Ⓛ indication is on your left ear and the Ⓡ indication is on your right ear. The Ⓛ unit has a tactile dot.



A: Tactile dot
Adjust the headset position to fit your ears.

3 Play back music or video on the Bluetooth device.

Adjust the volume on the Bluetooth device.

4 Adjust the volume by pressing the +/- buttons of the headset.

When the volume reaches the maximum or minimum, an alarm sounds.

Hint

- The headset supports SCMS-T content protection. You can enjoy music and other audio on the headset from a device such as a portable TV that supports SCMS-T content protection.
- Depending on the Bluetooth device, it may be necessary to adjust the volume or set the audio output setting on the Bluetooth device.

- The headset volume during a call and during music playback can be independently adjusted. Changing the call volume does not change the volume of music playback and vice versa.

Note

- If the communication condition is poor, the Bluetooth device may react incorrectly to the operation on the headset.

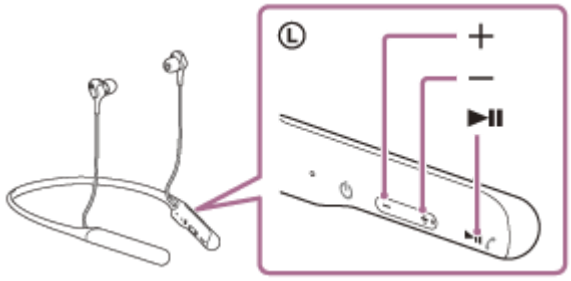
WI-C600N

Controlling the audio device (Bluetooth connection)

If your Bluetooth device supports the device operating function (compatible protocol: AVRCP), then the following operations are available. The available functions may vary depending on the Bluetooth device, so refer to the operating instructions supplied with your device.



Each button has the following function:

►II

- Press once briefly during pause to start playback.
- Press once briefly during playback to pause.
- Press twice to skip to the beginning of the next track. (● ●)
- Press three times to skip to the beginning of the previous track (or the current track during playback). (● ● ●)
- Press once and release and then press again and hold to fast-forward. (● ▬)
- Press twice and release and then press again and hold to fast-reverse. (● ● ▬)

+/-

Adjust the volume.

Note

- If the communication condition is poor, the Bluetooth device may react incorrectly to the operation on the headset.
- The available functions may vary depending on the connected device. In some cases, it may operate differently or may not work at all when the operations described above are performed.
- When you use an iPhone, Siri may be activated by pressing and holding the ✆ button.

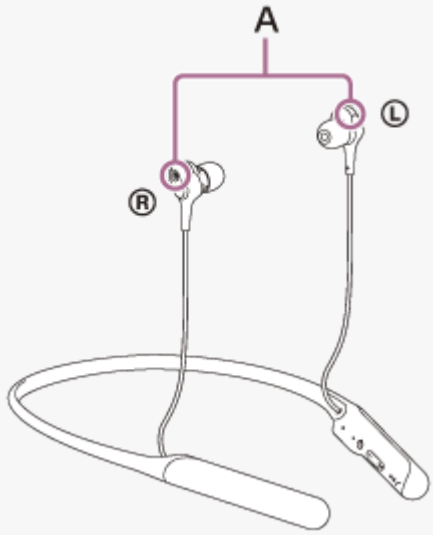
What is noise canceling?

The noise canceling circuit actually senses outside noise with built-in microphones and sends an equal-but-opposite canceling signal to the headset.

Note

- The noise canceling effect may not be pronounced in a very quiet environment, or some noise may be heard.
- Depending on how you wear the headset, the noise canceling effect may vary or a beeping sound (feedback) may be heard. In this case, take off the headset and put it on again.
- The noise canceling function works primarily on noise in the low frequency band. Although noise is reduced, it is not completely canceled.
- When you use the headset in a train or a car, noise may occur depending on street conditions.
- Mobile phones may cause interference and noise. Should this occur, move the headset further away from the mobile phone.
- Do not cover the headset microphone with your hand. The noise canceling function or the Ambient Sound Mode may not work properly, or a beeping sound (feedback) may occur. In this case, remove your hand from the headset microphone.



A: Microphones

Wireless Noise Canceling Stereo Headset
WI-C600N

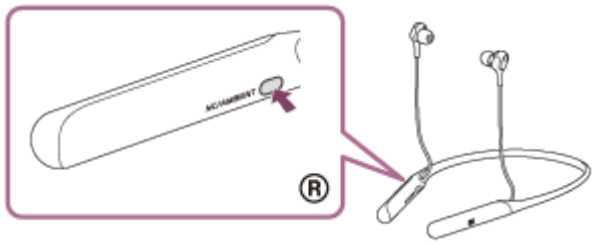
Using the noise canceling function

If you use the noise canceling function, you can enjoy music without being disturbed by ambient noise.

1. **Turn on the headset.**

   You hear the voice guidance “Power on”.
   The noise canceling function is turned on automatically when you turn on the headset.

To turn off the noise canceling function



Press the NC/AMBIENT button repeatedly until the noise canceling function is turned off.
Each time the button is pressed, the function switches as follows and is announced by the voice guidance.

The Ambient Sound Mode: ON

↓

The noise canceling function/Ambient Sound Mode: OFF

↓

The noise canceling function: ON/Ambient Sound Mode: OFF

Hint

- You can also change the settings of the noise canceling function and the Ambient Sound Mode with the "Sony | Headphones Connect" app.

Note

- If the NC/AMBIENT button is set as the Google Assistant button, the noise canceling function cannot be switched by pressing the NC/AMBIENT button. You can also change the settings of the noise canceling function and the Ambient Sound Mode with the "Sony | Headphones Connect" app.
- If the NC/AMBIENT button is set as the Amazon Alexa button, the noise canceling function cannot be switched by pressing the NC/AMBIENT button. You can also change the settings of the noise canceling function and the Ambient Sound Mode with the "Sony | Headphones Connect" app.
- The headset cannot achieve the full noise canceling performance unless the supplied earbuds are used.
- The full noise canceling performance cannot be achieved unless the earbuds are firmly inserted into the ears. Adjust the headset position to fit your ears.

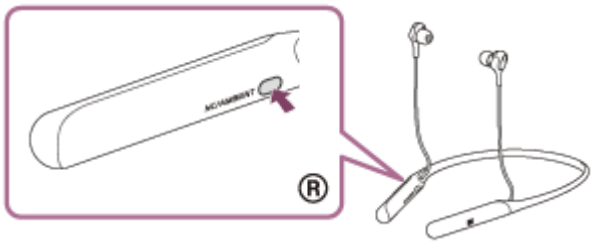
Wireless Noise Canceling Stereo Headset
WI-C600N

Using the AI noise canceling function

This is a convenient function which provides the most effective noise canceling mode by immediately analyzing the ambient sound components. In particular, use this function if you feel that you are not receiving the full effect of the noise canceling function when moving and the ambient noise changes significantly.

1. **Press and hold the NC/AMBIENT button with the power turned on until you hear a sound from the headset which announces the start of the analysis (about two seconds).**



The analysis of the ambient sound begins (about 3 seconds). The music volume decreases during music playback. When the analysis finishes, it automatically switches to the optimal noise canceling mode, and the music volume returns to normal.

Noise canceling mode types

NC Mode A:
Suitable for noise that contains a lot of mid-low range sounds. Effective for generally noisy environments.
NC Mode B:
Suitable for noise that contains a lot of very low range sounds. Mainly effective for noise on buses and trains.
NC Mode C:
Suitable for relatively quiet and wide-range noise. Mainly effective for office and office equipment noise.

Note

- The noise canceling mode returns to NC Mode A when:
  - the noise canceling function is turned off, then turned on again.
  - the headset is turned off, then turned on again.

4-739-218-11(4) Copyright 2018 Sony Corporation

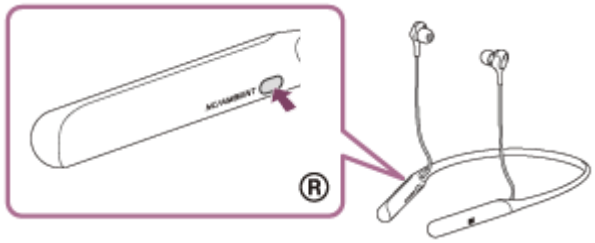
Wireless Noise Canceling Stereo Headset
WI-C600N

Listening to ambient sound during music playback (Ambient Sound Mode)

You can hear ambient sound through the microphones embedded in the left/right units of the headset while enjoying music.

To activate the Ambient Sound Mode

Press the NC/AMBIENT button while the noise canceling function is on.



To change the setting of the Ambient Sound Mode

You can switch between Normal mode and Voice mode (settings of the Ambient Sound Mode) by connecting the smartphone (with the “Sony | Headphones Connect” app installed) and the headset via the Bluetooth function.
Normal mode: While enjoying music, you can hear the surrounding sound as if you were not wearing the headset.
Voice mode: While enjoying music, you can pick up the sound (such as announcements in the train) that you want to hear.

To deactivate the Ambient Sound Mode

Press the NC/AMBIENT button repeatedly until the Ambient Sound Mode is turned off.
Each time the button is pressed, the function switches as follows and is announced by the voice guidance.

The noise canceling function/Ambient Sound Mode: OFF

The noise canceling function: ON/Ambient Sound Mode: OFF

The Ambient Sound Mode: ON

Hint

- Depending on the ambient condition and the type/volume of audio playback, the ambient sound may not be heard even when using the Ambient Sound Mode. Do not use the headset in places where it would be dangerous if you are unable to hear ambient sounds such as on a road with car and bicycle traffic.
- If the headset is not worn properly, the Ambient Sound Mode may not work correctly. Wear the headset properly.
- You can also change the settings of the noise canceling function and the Ambient Sound Mode with the "Sony | Headphones Connect" app.
- Ambient Sound Mode settings changed with the “Sony | Headphones Connect” app are stored in the headset. You can enjoy music with the stored settings of the Ambient Sound Mode even when the headset is connected to other devices which do not have the “Sony | Headphones Connect” app installed.

Note

- Depending on the surrounding environment, wind noise may increase when the Ambient Sound Mode is turned on. In that case, change the settings from Normal mode to Voice mode with the “Sony | Headphones Connect” app. If the wind noise is still significant, turn off the Ambient Sound Mode.

About the sound quality mode

The following two sound quality modes can be selected during Bluetooth playback. You can switch the settings and check the sound quality mode with the "Sony | Headphones Connect" app.
Priority on sound quality: prioritizes the sound quality (default).
Priority on stable connection: prioritizes the stable connection.

- When using an AAC or aptX compatible device, set the “Priority on sound quality” mode.
- If the connection is unstable, such as when producing only intermittent sound, select the “Priority on stable connection” mode.

Note

- The playback time may shorten depending on the sound quality and the conditions under which you are using the headset.
- Depending on the ambient conditions in the area where you are using the headset, intermittent sound may still occur even if the “Priority on stable connection” mode is selected.

WI-C600N

Supported codecs

A codec is an audio coding algorithm used when transmitting sound via a Bluetooth connection.
The headset supports the following 3 codecs for music playback via an A2DP connection: SBC, AAC, and aptX.

- SBC
  This is an abbreviation for Subband Codec.
  This is the standard audio coding technology used by Bluetooth devices.
  All Bluetooth devices support SBC.

- AAC
  This is an abbreviation for Advanced Audio Coding.
  AAC is mainly used by Apple products such as iPhones, and it provides higher sound quality than that of SBC.

- aptX
  This is an audio coding technology. aptX is used by some Android smartphones, and it provides higher sound quality than that of SBC.

With the headset set to the “Priority on sound quality” mode, when music in one of the above codecs is transmitted from a connected device, the headset switches to that codec automatically and plays back the music in the same codec. However, depending on the device to be connected with the headset, you may need to set the device beforehand to listen to music in a different codec on the headset, even if the device supports a codec of higher sound quality than SBC. Refer to the operating instructions supplied with the device regarding setting the codec.

Wireless Noise Canceling Stereo Headset
WI-C600N

About the DSEE function

The DSEE function complements the high-range sound, which is often lost from compressed sound sources, in the headset to the equivalent of CD sound quality.
Sound sources compressed by streaming playback, MP3, Bluetooth transmission codec, etc. are played with natural and expansive sound.
The DSEE function can be set up on the “Sony | Headphones Connect” app, and is only available when connected to the headset via Bluetooth connection.
The DSEE function is disabled when transmitting a sound source using aptX.

Wireless Noise Canceling Stereo Headset
WI-C600N

Receiving a call

You can enjoy a hands-free call with a smartphone or mobile phone that supports the Bluetooth profile HFP (Hands-free Profile) or HSP (Headset Profile), via a Bluetooth connection.

- If your smartphone or mobile phone supports both HFP and HSP, set it to HFP.
- The operation may vary depending on the smartphone or mobile phone. Refer to the operating instructions supplied with your smartphone or mobile phone.
- The headset only supports normal incoming calls. Calling apps for smartphones and computers are not supported.

Ring tone

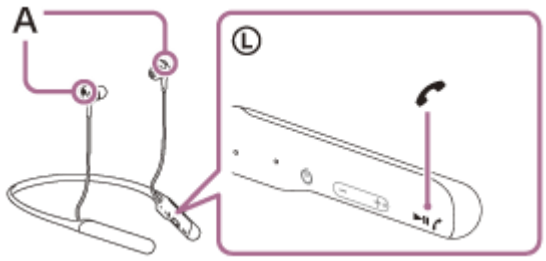
When an incoming call arrives, a ring tone will be heard from the headset, and the indicator (blue) flashes quickly.
You will hear either of following ring tones, depending on your smartphone or mobile phone.

- Ring tone set on the headset
- Ring tone set on the smartphone or mobile phone
- Ring tone set on the smartphone or mobile phone only for a Bluetooth connection

1. **Connect the headset to a smartphone or mobile phone beforehand.**

2. **When you hear a ring tone, press the button on the headset and receive the call.**

   When an incoming call arrives while you are listening to music, playback pauses and a ring tone will be heard from the headset.



A: Microphones
Used together with the noise canceling function microphone.

If no ring tone is heard via the headset

- The headset may not be connected with the smartphone or mobile phone over HFP or HSP. Check the connection status on the smartphone or mobile phone.
- If playback does not pause automatically, operate the headset to pause playback.

3. **Press the + or - button to adjust the volume.**

   When the volume reaches the maximum or minimum, an alarm sounds.

4. **To end the call, press the button on the headset again.**

   If you received a call during music playback, music playback resumes automatically.

Hint

- Some smartphones or mobile phones receive calls with the phone instead of the headset by default. With an HFP or HSP connection, switch the call to the headset by holding the button for about 2 seconds or by using your smartphone or mobile phone.
- Volume for a call can be adjusted during a telephone conversation only.
- The headset volume during a call and during music playback can be independently adjusted. Changing the call volume does not change the volume of music playback and vice versa.

Note

- Depending on the smartphone or mobile phone, playback may not resume automatically even if you finish the call.
- Use a smartphone or mobile phone at least 50 cm away from the headset. Noise may result if the smartphone or mobile phone are too close to the headset.

Making a call

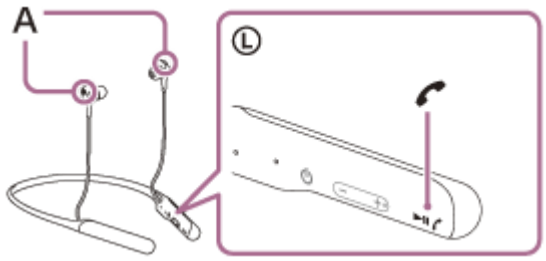
You can enjoy a hands-free call with a smartphone or mobile phone that supports the Bluetooth profile HFP (Hands-free Profile) or HSP (Headset Profile), via a Bluetooth connection.

- If your smartphone or mobile phone supports both HFP and HSP, set it to HFP.
- The operation may vary depending on the smartphone or mobile phone. Refer to the operating instructions supplied with your smartphone or mobile phone.
- The headset only supports normal incoming calls. Calling apps for smartphones and computers are not supported.

1 Connect the headset to a smartphone or mobile phone beforehand.

2 Operate your smartphone or mobile phone to make a call.

When you make a call, the dial tone is heard from the headset.
If you make a call while you are listening to music, playback pauses.
If no dial tone is heard via the headset, switch the call device to the headset using your smartphone or mobile phone or by holding the button down for about 2 seconds.



A: Microphones
Used together with the noise canceling function microphone.

3 Press the + or - button to adjust the volume.

When the volume reaches the maximum or minimum, an alarm sounds.

4 To end the call, press the button on the headset again.

If you made a call during music playback, music playback resumes automatically after ending the call.

Hint

- Volume for a call can be adjusted during a telephone conversation only.
- The headset volume during a call and during music playback can be independently adjusted. Changing the call volume does not change the volume of music playback and vice versa.

Note

- Use a smartphone or mobile phone at least 50 cm away from the headset. Noise may result if the smartphone or mobile phone is too close to the headset.

Functions for a phone call

The functions available during a call may vary depending on the profile supported by your smartphone or mobile phone. In addition, even if the profile is the same, the functions may vary depending on the smartphone or mobile phone. Refer to the operating instructions supplied with your smartphone or mobile phone.

Supported profile: HFP (Hands-free Profile)

During standby/music playback

- Press and hold the button to start the voice dial function of the smartphone/mobile phone (*), or activate the Google app of the Android smartphone or Siri of the iPhone.

Outgoing call

- Press the button once to cancel an outgoing call.
- Press and hold the button for about 2 seconds to change the call device between the headset and the smartphone or mobile phone.

Incoming call

- Press the button once to answer a call.
- Press and hold the button for about 2 seconds to reject a call.

During call

- Press the button once to finish a call.
- Press and hold the button for about 2 seconds to change the call device between the headset and the smartphone or mobile phone.

Supported profile: HSP (Headset Profile)

Outgoing call

- Press the button once to cancel an outgoing call. (*)

Incoming call

- Press the button once to answer a call.

During call

- Press the button once to finish a call. (*)

* Some devices may not support this function.

Using the Google Assistant

By using the Google Assistant feature that comes with the smartphone, you can speak to the headset’s microphone to operate the smartphone or perform the search.

Compatible smartphones

- Smartphones installed with Android 5.0 or later (The latest version of Google app is required.)
- iPhone/iPod touch (Installation of the Google Assistant application is required.)

1. **If your smartphone is an iPhone/iPod touch, open the Google Assistant app.**

   If your smartphone is an Android smartphone, skip this step.

2. **Open the "Sony | Headphones Connect" app, and set the NC/AMBIENT button as the Google Assistant button.**

   When using the Google Assistant for the first time, open the Google Assistant app and tap the [Finish headphones setup] button on the Conversation View, and follow the on-screen instructions to complete initial settings for the Google Assistant.
   For details of the "Sony | Headphones Connect" app, refer to the following URL.
   https://rd1.sony.net/help/mdr/hpc/h_zz/

3. **Press the NC/AMBIENT button to use the Google Assistant.**

   - Press and hold to input a voice command.
   - Press once to read out the notification.
   - Press twice to cancel the voice command.

For details of the Google Assistant, refer to the following website:
https://assistant.google.com
https://g.co/headphones/help

Hint

- Check or update the software version of the headset with the "Sony | Headphones Connect" app.
- When the Google Assistant is not available for reasons such as not being connected to the network, a voice guidance “The Google Assistant is not connected” is heard.
- If you do not see the [Finish headphones setup] button on the Google Assistant app, please unpair the headphones from the Bluetooth settings of your smartphone and redo the pairing process.

Note

- If the NC/AMBIENT button is set as the Google Assistant button in step 2, the noise canceling function cannot be operated from the headset.
- If the NC/AMBIENT button is set as the Google Assistant button in step 2, the Amazon Alexa function cannot be operated from the headset.
- The Google Assistant may not be used in some countries, regions, or languages.

Wireless Noise Canceling Stereo Headset
WI-C600N

Using Amazon Alexa

By using Amazon Alexa feature that comes with the smartphone, you can speak to the headset to operate the smartphone or perform the search.

Compatible smartphones

- Smartphones installed with Android 5.1 or later, or iOS 10.0 or later.
- Installation of the latest Amazon Alexa app is required.

1. **Open the Amazon Alexa app.**

2. **Open the "Sony | Headphones Connect" app, and set the NC/AMBIENT button as the Amazon Alexa button.**

   For details of the "Sony | Headphones Connect" app, refer to the following URL.
   https://rd1.sony.net/help/mdr/hpc/h_zz/

3. **Press the NC/AMBIENT button to use Amazon Alexa.**

   - Press to input a voice command.
   - Press once to cancel the voice command.
   - If there is no voice, it will be canceled.

For details of Amazon Alexa, refer to the following website:
https://www.amazon.com/b?node=16067214011

Hint

- Check or update the software version of the headset with the "Sony | Headphones Connect" app.
- When Amazon Alexa is not available for reasons such as not being connected to the network, a voice guidance “Either your mobile device isn't connected; or you need to open the Alexa App and try again” is heard.

Note

- If the NC/AMBIENT button is set as the Amazon Alexa button in step 2, the noise canceling function cannot be operated from the headset.
- If the NC/AMBIENT button is set as the Amazon Alexa button in step 2, the Google Assistant function cannot be operated from the headset.
- Alexa is not available in all languages and countries/regions.
  See www.amazon.com/alexa-availability for details.

Wireless Noise Canceling Stereo Headset
WI-C600N

Using the voice assist function (Google app)

By using the Google app feature that comes with the Android smartphone, you can speak to the headset's microphone to operate the Android smartphone.

1. **Set assistant and voice input settings on the Google app.**

   On the Android smartphone, select [Settings] - [Apps], then select the gear icon appeared in the top-right corner of the display.
   Then, select [Assist & voice input] - [Assist app], and then set [Assist app] to the Google app.
   The above procedure is an example. For details, refer to the operating instructions of the Android smartphone.
   Note: The latest version of the app may be required.
   For details on the Google app, refer to the operating instructions or the support website of the Android smartphone, or the Google Play store website.
   The Google app may not be activated from the headset depending on specifications of the Android smartphone.

2. **Connect the headset to the Android smartphone via Bluetooth connection.**

3. **When the Android smartphone is in standby or playing music, press and hold the button to activate the Google app.**

   The Google app is activated.

4. **Make a request to the Google app through the headset's microphone.**

   For details on the Google app, such as apps which work with the Google app, refer to the operating instructions of the Android smartphone.
   After activating the Google app, when a certain time has passed without requests, the Google app will be deactivated.

Note

- If the NC/AMBIENT button is set as the Google Assistant button, the voice assist function (Google app) is not available.
- If the NC/AMBIENT button is set as the Amazon Alexa button, the voice assist function (Google app) is not available.
- The Google app cannot be activated when you say "Ok Google" even when the Android smartphone's "Ok Google" setting is on.

Wireless Noise Canceling Stereo Headset
WI-C600N

Using the voice assist function (Siri)

By using the Siri feature that comes with iPhone, you can speak to the headset's microphone to operate the iPhone.

1. **Turn Siri on.**

   On iPhone, select [Settings] - [Siri & Search] to turn [Press Home for Siri] and [Allow Siri When Locked] on.
   The operation above is an example. For details, refer to the operating instructions of the iPhone.
   Note: For details on Siri, refer to the operating instructions or support website of the iPhone.

2. **Connect the headset to the iPhone via Bluetooth connection.**

3. **When the iPhone is using the Bluetooth connection and in standby or playing music, press and hold the button until Siri is activated.**

4. **Make a request to Siri through the headset's microphone.**

   For details on Siri, such as apps which work with Siri, refer to the operating instructions of the iPhone.

5. **To continue to request, press the button before Siri is deactivated.**

   After activating Siri, when a certain time has passed without requests, Siri will be deactivated.

Note

- Siri cannot be activated when you say "Hey Siri" even when the iPhone's "Hey Siri" setting is on.

What you can do with "Sony | Headphones Connect" app

When you connect the smartphone (with the “Sony | Headphones Connect” app installed) and the headset via the Bluetooth function, you can do the following.

- Easy pairing
- Display the remaining battery life of the headset
- Display the Bluetooth connection codec
- Adjust the noise canceling function and Ambient Sound Mode (ambient sound control)
- Select the Equalizer setting
- Customize the Equalizer setting
- Switch the sound quality mode by setting the Bluetooth connection mode
- Set the DSEE function
- Change the function of the NC/AMBIENT button
- Auto power off setting
- Adjust volume
- Play music/ pause, fast-reverse/ fast-forward
- Check the connection status and the settings of the headset
- Check the headset software version
- Headset software update
- Switch the voice guidance language
- Voice guidance on/off setting

For details of the “Sony | Headphones Connect” app, refer to the following URL.
https://rd1.sony.net/help/mdr/hpc/h_zz/

Hint

- The operation of the “Sony | Headphones Connect” app depends on the audio device. The app specifications and screen design may change without prior notice.

Precautions

On Bluetooth communications

- Bluetooth wireless technology operates within a range of about 10 m (30 feet). The maximum communication distance may vary depending on the presence of obstacles (people, metal objects, walls, etc.) or the electromagnetic environment.
- Microwaves emitting from a Bluetooth device may affect the operation of electronic medical devices. Turn off this unit and other Bluetooth devices in the following locations, as it may cause an accident:
  - in hospitals, near priority seating in trains, locations where inflammable gas is present, near automatic doors, or near fire alarms.
- This product emits radio waves when used in wireless mode. When used in wireless mode on an airplane, follow flight crew directions regarding permissible use of products in wireless mode.
- The audio playback on this unit may be delayed from that on the transmitting device, due to the characteristics of Bluetooth wireless technology. As a result, the sound may not be in sync with the image when viewing movies or playing games.
- The unit supports security functions that comply with the Bluetooth standard as a means of ensuring security during communication using Bluetooth wireless technology. However, depending on the configured settings and other factors, this security may not be sufficient. Be careful when communicating using Bluetooth wireless technology.
- Sony shall assume no responsibility for any damages or loss resulting from information leaks that occur when using Bluetooth communications.
- Connection with all Bluetooth devices cannot be guaranteed.
  - Bluetooth devices connected with the unit must comply with the Bluetooth standard prescribed by Bluetooth SIG, Inc., and must be certified as compliant.
  - Even when a connected device complies with the Bluetooth standard, there may be cases where the characteristics or specifications of the Bluetooth device make it unable to connect, or result in different control methods, display, or operation.
  - When using the unit to perform hands-free talking on the phone, noise may occur depending on the connected device or the communication environment.
- Depending on the device to be connected, it may require some time to start communications.

Note on static electricity

- Static electricity accumulated in the body may cause mild tingling in your ears. To reduce the effect, wear clothes made from natural materials, which suppress the generation of static electricity.

Notes on wearing the unit

- After use, remove the headphones slowly.
- Because the earbuds achieve a tight seal in the ears, forcibly pressing them in or quickly pulling them out can result in eardrum damage. When putting the earbuds into your ears, the speaker diaphragm may produce a click sound. This is not a malfunction.

Others

- Do not subject the unit to excessive shock.
- The Bluetooth function may not work with a mobile phone, depending on the signal conditions and the surrounding environment.
- If you experience discomfort while using the unit, stop using it immediately.
- The earbuds may be damaged or deteriorate with long-term use and storage.
- If the earbuds become dirty, remove them from the unit and gently wash them by hand using a neutral detergent. After cleaning, thoroughly wipe off any moisture.

Cleaning the unit

- When the outside of the unit is dirty, clean it by wiping with a soft dry cloth. If the unit is particularly dirty, soak a cloth in a dilute solution of neutral detergent, and wring it well before wiping. Do not use solvents such as thinner, benzene, or alcohol, as they may damage the surface.

Do not use the headset close to the medical devices

- This product has magnets which may interfere with pacemakers, defibrillators and programmable shunt valves or other medical devices. Do not put this product close to these medical devices and the person who use any of these medical devices. Consult your doctor before using this product, if you have any concerns.

Do not place cards with magnets in the vicinity of the headset.

- This product has magnets. Placing cards with magnets in the vicinity of the product may affect the magnetism of the card and render it unusable.

What can I do to solve a problem?

If the headset does not function as expected, try the following steps to resolve the issue.

- Find the symptoms of the issue in this Help Guide, and try any corrective actions listed.
- Charge the headset.
  You may be able to resolve some issues by charging the headset battery.
- Reset the headset.
- Initialize the headset.
  This operation resets volume settings, etc., and deletes all pairing information.

- Look up information on the issue on the customer support website.

If the operations above do not work, consult your nearest Sony dealer.

Wireless Noise Canceling Stereo Headset
WI-C600N

Low sound level

- Turn up the volume of the headset and the connected device.
- Connect the Bluetooth device to the headset once again.

4-739-218-11(4) Copyright 2018 Sony Corporation

Wireless Noise Canceling Stereo Headset
WI-C600N

There is a difference in volume between the left and right sides, insufficient low-frequency sound.

- Size M earbuds come attached to the left and right sides of the headset at the time of purchase. If you feel that there is insufficient low frequency sound and a difference in volume between the left and right sides, change the earbuds to another size to comfortably and snugly fit your left and right ears.

Related Topic

- Replacing the earbuds

4-739-218-11(4) Copyright 2018 Sony Corporation

Wireless Noise Canceling Stereo Headset
WI-C600N

Low sound quality

- Turn down the volume of the connected device if it is too loud.
- Keep the headset away from microwave ovens, Wi-Fi devices, etc.
- Bring the headset closer to the Bluetooth device. Remove any obstacles between the headset and the Bluetooth device.
- Keep the headset away from a TV.
- Switch the Bluetooth connection to A2DP by operating the Bluetooth device when HFP or HSP is set.
- If you connect a device with a built-in radio or tuner to the headset, broadcasts may not be received or the sensitivity may be reduced. Move the headset away from the connected device and try again.
- If you have previously connected the headset to this Bluetooth device, only an HFP/HSP Bluetooth connection may be established when the headset is turned on. Use the Bluetooth device to connect via an A2DP Bluetooth connection.
- When listening to music from a computer on the headset, the sound quality may be poor (e.g., difficult to hear the singer's voice, etc.) for the first few seconds after a connection is established.
  This is due to the computer specifications (prioritizes communication at the start of transmission and then switches to prioritizing audio quality several seconds later) and is not a headset malfunction. If the sound quality does not improve after a few seconds, press the ►II button on the headset once during playback. Or you can use the computer to establish an A2DP connection. As for the operations on your Bluetooth device, refer to the operating instructions supplied with your device.

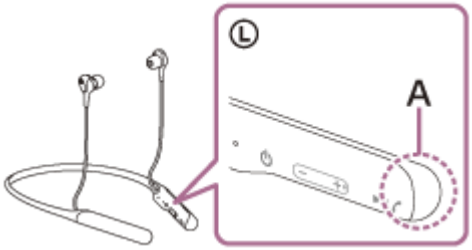
Wireless Noise Canceling Stereo Headset
WI-C600N

Sound skips frequently.

- Set the headset to “Priority on stable connection” mode. For details, see “About the sound quality mode”.
- Remove any obstacles between the antenna of the connecting Bluetooth device and the built-in antenna of the headset. The antenna of the headset is built into the part shown in the dotted line below.



A: Location of the built-in antenna

- Bluetooth communications may be disabled, or noise or audio dropout may occur under the following conditions.
  - When there is a human body between the headset and the Bluetooth device
    Put the Bluetooth device in the same direction as the antenna of the headset to improve the Bluetooth communications.
  - There is an obstacle, such as metal or a wall, between the headset and the Bluetooth device.
  - In places with wireless LAN, where a microwave oven is used, electromagnetic waves are generated, etc.

- The situation may be improved by changing the wireless playback quality settings or fixing the wireless playback mode to SBC on the transmitting device. For details, refer to the operating instructions supplied with the transmitting device.
- Because Bluetooth devices and Wi-Fi (IEEE802.11b/g/n) use the same frequency (2.4 GHz), microwave interference may occur and result in noise, audio dropouts, or communications being disabled if this headset is used near a Wi-Fi device. In such a case, perform the following steps.
  - Use this headset at least 10 m (30 feet) away from the Wi-Fi device.
  - If this headset is used within 10 m (30 feet) of a Wi-Fi device, turn off the Wi-Fi device.
  - Use this headset and the Bluetooth device as near to each other as possible.

- If you are enjoying music with your smartphone, the situation may be improved by shutting down unnecessary apps or restarting your smartphone.

4-739-218-11(4) Copyright 2018 Sony Corporation

Wireless Noise Canceling Stereo Headset
WI-C600N

The noise canceling effect is not sufficient.

- Make sure that the noise canceling function is turned on.
- Adjust the earpad position to fit your ears.
- The noise canceling function is effective in low frequency ranges such as airplanes, trains, offices, near air-conditioning, and is not as effective for higher frequencies, such as human voices.

Related Topic
